

# BESRAT ZEREHAIMANOT

## FULL-STACK ENGINEER

### PERSONAL PROFILE

Since my time in Software Engineering, I have loved the combination of frontend and backend design to create beautiful and seamless code that makes an impact. The usability of code to execute or achieve something significant is what drives me to build. I was inspired by the capabilities of software applications as a cloud solutions consultant at Oracle where I've gained experience driving needs based conversations centered around Oracle's enterprise cloud applications before shifting my focus to software development and the endless possibilities within this growing landscape. My effort as a full-stack web developer is to continue to proffer my skills as a design-minded engineer by facilitating the creation of platforms that enable efficiency, productivity and user-friendly experiences.

### EDUCATION :

**General Assembly** 2020  
Software Engineering Immersive

**UCLA** 2016  
**Major:** Environmental Science  
**Minor:** Entrepreneurship

### WORK EXPERIENCE

**General Assembly, Software Engineering Fellow**  
2020 New York City, NY

- Learned programming and computer science fundamentals, as well as software engineering best practices with regards to full-stack development
- Built secure full-stack applications by leveraging common design and architectural patterns like model-view-controller and Representational State Transfer
- Sample Projects

**A Music Journal:** Developed a full CRUD application using Node.js, Express and MongoDB useful for generating team rosters for sports organizations

**Capture:** A full-stack application that allows users to find photographers or register as a photographer themselves. Secured with professional grade user authentication. Backend built with Django & Python and frontend designed with Vue.js.

**Oracle Corporation, Cloud Solutions Consultant**  
2017-2019 Redwood City, CA

- Exceeded pipeline quotas in 6 out of 7 quarters, which led to progressed deals
- Conducted needs-analysis for small to medium-sized clients in the HR and Finance departments and demonstrated Oracle's cloud application solutions for business challenges across industry verticals
- Originated and executed go-to-market campaigns by collaborating with internal stakeholders, developing and presenting marketing resources and assisting with client solution demos
- Appointed as team lead and he onboard new colleagues, conduct tools training and reinforce best practices with regards to effective account management

### SKILLS

**Languages:** HTML, CSS, Javascript, Python and Ruby

**Frameworks:** Django, Node.js, Angular, Vue.js, React, Bootstrap, P5.js Ruby on Rails

**Database:** MongoDB and Postgres
