PROJECTS

- Utilized Java and Spring Framework to build a Vending Machine application that keeps track of items in the inventory, counts change, writes and reads to/from a file.
- Utilized Java and the Spring MVC framework to create a business application for a flooring company that enabled users to add, delete, & edit clients and orders. The program was also capable of reading and writing to files to allow for product and state tax updates.
- Built a website, a restaurant, that incorporated multiple pages, imagery, and internal links using HTML, CSS, Javascript, and Bootstrap.
- Built a web application, a supervillain database that keeps track of supervillains, using Java, SQL, Spring JdbcTemplate and Spring security.
